

Practical Woodworking - National 4

Learning in this Course will be primarily practical, hands-on and experiential in nature.

The aims of the Course are to enable learners to develop:

- skills in woodworking techniques
- skills in measuring and marking out timber sections and sheet materials
- safe working practices in workshop environments
- practical creativity and problem solving skills
- an understanding of sustainability issues in a practical woodworking context

This Course will also give learners the opportunity to develop thinking skills and skills in numeracy, employability, enterprise and citizenship.

Learners would normally be expected to have attained relevant skills and knowledge through prior experience such as National 3 Practical Craft Skills.

This course provides progression to National 5 Practical Woodworking and for some to employment, apprenticeships and/or training in practical technology and related fields including: crafts, construction, manufacturing, engineering, theatre, visual arts.

Course structure: The course has three units and an added value unit.

Assessment method

To gain an award for this course, learners need to pass all units. Each unit is graded Pass *or* Fail.
