

Practical Woodworking - National 5

Learning in this Course will be primarily practical, hands-on and experiential in nature.

The aims of the Course are to enable learners to develop:

- skills in woodworking techniques
- skills in measuring and marking out timber sections and sheet materials
- safe working practices in workshop environments
- practical creativity and problem solving skills
- an understanding of sustainability issues in a practical woodworking context

This Course will also give learners the opportunity to develop thinking skills and skills in numeracy, employability, enterprise and citizenship.

Learners would normally be expected to have attained relevant skills and knowledge through prior experience such as National 4 Practical woodworking.

This course provides progression to:

- National Certificate Group Awards (NCGAs)
- a range of other practical technological Courses at National 5
- Skills for Work and sector-specific SQA qualifications

For some, the Course may ultimately provide progression to employment, apprenticeships and/or training in practical technology and related fields including: crafts, construction, manufacturing, engineering, theatre, visual arts

Course structure: The course has three units and a Course Assessment

Assessment method

To gain an award for this course, learners need to pass both units and both components of the Course Assessment.

Awards will be graded A – C.
